Day One Pre-Materials:

STOP. If you have not filled out the pre-survey, please do that now. Look for an email with the subject line: "C-START Training PRE-Survey" (if you attended a prior C-START workshop, you have already done this step).

The following table outlines the preparation program for Day 1 of the C-START Web workshop (CSS/HTML). Please complete all activities and exercises prior to the first day of the program. To keep the pre-material focused, in the Notes/Comments section we've identified a number of sections or subsections that you can skip (but feel free to read if you're interested!)

To maximize the benefit for attendees, during the workshop we plan to cover material that would translate to between six and twelve classroom sessions (depending on your course, level of students, etc.). This is clearly too much to learn in just one day, so it is critical that you familiarize yourself with the syntax of HTML and CSS ahead of time. Putting effort into the pre-materials will result in a more rewarding experience during the workshop. This sheet will not be collected or evaluated in any way. Use the links below to get started.

HTML Topics: <u>http://www.w3schools.com/html/default.asp</u> CSS Topics: <u>http://www.w3schools.com/css/default.asp</u>

If you hit road blocks, get stuck, or have questions while working through the assignments, feel free to contact Shelly Konopka at mkonopka@mymail.mines.edu

	HTML Topics	Notes/Comments
	HTML Introduction	Skip Common Declarations
	HTML Editors	We'll be using Notepad++. Pay attention to file extensions.
	HTML Basic	We'll practice these tags in an exercise
	HTML Elements	We'll also practice these
	HTML Attributes	Skip lang and title attributes. We'll explore img attributes during the workshop.
	HTML Headings	Important
	HTML Paragraphs	Important
skip	HTML Styles	These sections can be skipped.
	HTML Formatting	
	HTML Quotations	
	HTML ComputerCode	
	HTML Comments	Skip conditional comments
skip	HTML Colors	

skip	HTML CSS	Skip, we'll use the CSS tutorials
	HTML Links	Skip local links. We'll use CSS for link colors, but it's good to understand that links can be styled. Skip target attribute (_blank can be useful) Skip image as link (useful but more advanced) Skip create a bookmark (also useful, more advanced)
	HTML Images	Material from Images in Another Folder on is optional
	HTML Table	Optional. Likely to be covered in a web course, but not early in the semester. We won't cover.
	HTML Lists	Skip from HTML Description Lists to end
	HTML Head	This will be more important for Day 2
	CSS Topics	
	CSS Introduction	Play with the buttons. See how the same page can look very different based on CSS.
	CSS Syntax	Selectors are important. We'll have examples of each, some on Day 1 and some on Day 2.
	CSS How To	Skip Internal Style Sheet and Inline Styles.
	CSS Colors	Colors are fun, play with these examples!
	CSS Backgrounds	We will only use background-color, but the other options are fairly easy and may be fun for students.
skip	CSS Borders CSS Margins CSS Padding CSS Box Model CSS Outline	Skip for now, but we'll use much of this in Day 2
	CSS Height/Width	We'll only use height/width with images for now.
	CSS Text	Skip from Text Transformation on
	CSS Fonts	Skip Font Variant
	CSS Links	Skip from Text Decoration on
	CSS Lists CSS Tables	Topics you might want to explore on your own.
	CSS Position	Just look at absolute for Day 1. We'll do others for Day 2
